

Bad Words (v1.0)

1. Description

Kicks people for using bad language.

Kicks people from the channel when they use bad language. The language considered bad is part of the configuration of this plugin.

2. Configuration

The configuration file for this plugin is `system/BadWords/BadWordsConfig.xml`

2.1. `commandAddBadWord`

The command adds a word to the bad word list. You can set the `authLevel` to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandAddBadWord authLevel="trusted" output="notice">!addswear</commandAddBadWord>
```

2.2. `commandRemoveBadWord`

The command removes a word from the bad word list. You can set the `authLevel` to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandRemoveBadWord authLevel="trusted" output="notice">!removeswear</commandRemoveBadWord>
```

2.3. `commandShowBadWords`

The command is for requesting a list of all of the bad words via DCC chat. You can set the `authLevel` to control who is allowed to access the command. command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE

```
<commandShowBadWords authLevel="trusted">!showswears</commandShowBadWords>
```

2.4. `badWord`

The words that can be added by the `!addswear` command, removed by the `!removeswear` command, and shown by the `!showswears` command. The words can also be added directly to the config file and then the plugin can be reloaded.

- **word** - the word that will cause the kick

```
<badWord word="nasty" />
```
