

BF Tracks (v1.0)

1. Description

The BF Tracks plugin searches through bfracks and displays player info to IRC.

This plugin allows you to retrieve player information from <http://www.bfracks.net> and <http://vietnam.bfracks.net>. You can get ranking information or live player information. There is also an longer search useful for clan listings.

2. Configuration

The configuration file for this plugin is **system/BFTracks/BFTracksConfig.xml**

2.1. commandBF

The command to get a player ranking for BF. You can set the authLevel to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandBF authLevel="none" output="channel">!bf</commandBF>
```

2.2. commandBFLive

The command to get live player information for BF. You can set the authLevel to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandBFLive authLevel="none" output="channel">!bflive</commandBFLive>
```

2.3. commandBFClanList

The command to get a clan listing for BF. You can set the authLevel to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandBFClanList authLevel="none" output="pm">!bfclanlist</commandBFClanList>
```

2.4. commandBFV

The command to get a player ranking for BFV. You can set the authLevel to control who is allowed to access the command.

The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandBFV authLevel="none" output="channel">!bfv</commandBFV>
```

2.5. commandBFVLive

The command to get live player information for BFV. You can set the authLevel to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandBFVLive authLevel="none" output="channel">!bfvlive</commandBFVLive>
```

2.6. commandBFVClanList

The command to get a clan listing for BFV. You can set the authLevel to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandBFVClanList authLevel="none" output="pm">!bfvclanlist</commandBFVClanList>
```

2.7. commandBFAllLive

The command to get live player information for both BF and BFV. You can set the authLevel to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandBFAllLive authLevel="none" output="pm">!alllive</commandBFAllLive>
```

2.8. maxResults

Sets how many lines to return for the different query types.

- **playerInfo** - player ranking result length
- **liveInfo** - live player information result length
- **clanListInfo** - clan listing result length

```
<maxResults playerInfo="3" liveInfo="5" clanListInfo="30"/>
```

2.9. playerInfo

How the output for the player and clanlist ranking will appear. The colours and formatting are explained in the [Output Formatting](#) page.

- **\$name** - the name of the player
- **\$ranking** - their ranking position
- **\$points** - their points in the system
- **\$url** - url to their page in the system

```
<playerInfo>$DARK_GREEN$name$NORMAL :: [ $BOLD$BLUE$ranking$NORMAL ] ($DARK_GREEN$points$NORMAL
points) :: $UNDERLINE$OLIVE$url</playerInfo>
```

2.10. liveInfo

How the output for the live info will appear. The colours and formatting are explained in the [Output Formatting](#) page.

- **\$name** - the name of the player
- **\$score** - current score
- **\$kills** - current kills
- **\$deaths** - current deaths
- **\$server** - name of the server
- **\$ip** - ip of the server
- **\$map** - current map

```
<liveInfo>$DARK_GREEN$name$NORMAL [ $BLUE$BOLD$score$NORMAL / $DARK_GREEN$kills$NORMAL / $RED$deaths$NORMAL ]
::
$OLIVEServer: $BOLD$server$NORMAL IP: $REVERSE$ip$NORMAL:: $DARK_GRAYMap:
$UNDERLINE$map</liveInfo>
```

3. Commands

3.1. Show BF player stats
