

JMegaHal AI (v1.1)

1. Description

A chat back plugin.

Uses the JMegaHal API from Jibbler to create an appearance of intelligence. The bot will respond when it's name is said in normal channel text.

2. Configuration

There is no configuration available for this plugin at this time.

3. Commands

3.1. Save the brain

Command: !save

Description: This will save the current words that it has learnt. Please note that the brain is also saved if the plugin is unloaded, or if the bot is shut down with the "die" or "restart" commands.

Auth Level: master

Where to give command: channel

Outputs to: notice

Example(s):

- !save

4. Change History

v1.1	Autosave by xkr47
v1.0	First Version by DeadEd
