

Log (v1.1)

1. Description

Simple channel logging.

Logs channel activity to a log file. The log can be one single log for the whole bot or a log for each channel that the bot is in.

2. Configuration

The configuration file for this plugin is **system/Log/LogConfig.xml**

2.1. logfile

If logPerChannel is set to yes, the log file name will be prepended with the channel name.

- **logPerChannel** - yes, no
- **dir** - directory where to write the logfile(s)

```
<logfile logPerChannel="yes" dir="">ppf.log</logfile>
```

3. Commands

There are no user commands for this plugin at this time.
