Geeklog Search (v1.0)

1. Description

Search the configured Geeklog site

2. Configuration

The configuration file for this plugin is **system/GeeklogSearch/GeeklogSearchConfig.xml**

2.1. commandSearch

The command for searching the site. You can set the authLevel to control who is allowed to access the command. The output is used to define where the output from the command will go.

- **authLevel** - ANY, ADMIN, MASTER, TRUSTED, NONE
- **output** - CHANNEL, PM, NOTICE

```
<commandSearch authLevel="none" output="channel">!glsearch</commandSearch>
```

2.2. searchURL

The URL to the search page on your Geeklog site

```
<searchURL>http://www.myglsite.com/search.php</searchURL>
```

2.3. number-of-results

How many search results will be displayed

```
<number-of-results>3</number-of-results>
```

3. Commands
